

- Cold chain, beta 16
- Anneal to beta 8
- Four restarts to beta 8
- Nine-replica tempering, cold beta 4
- Anneal to beta 16
- Four restarts to beta 16

Mean gap to exact ground state, per spin (3 seeds)

8x8 mixed (64 spins)

16x16 mixed (256 spins)

24x24 mixed (576 spins)

Hold-phase energy of the best chain per trial against the exact max-plus transfer-matrix ground state.
CPU software simulation, two-colour block Gibbs; 16 trials per cell; no hardware claim.
